Directors' Report

Performance and Growth of Assets

The second half of 2023 saw positive returns across equity and fixed income markets, despite a series of risk events and heightened market volatility throughout the period.

A moderation in inflation data and dovish messaging by the US Federal Reserve Board (Fed) eventually sent asset prices higher by the end of calendar year (CY) 2023.

In respect of global equities, MSCI ACWI gained +7.48%. Regionally, Latin America led the gains with +12.30%, followed by the US, with the S&P rising +8.04%. Asia Pacific ex Japan and emerging markets (EM) lagged during the period as they were weighed down by China; despite this, the two regions still gained +4.37% and +4.92%, respectively.

Sector wise, the financial services sector performed well, gaining +12.72%, followed by information technology at +10.49%. Consumer staples was the only sector in negative territory during the period, losing -1.13%.

Fixed income markets also ended the period in positive territory, even though yields moved higher. The FTSE World Government Bond Index gained +3.47% and the Bloomberg Global Aggregate Index was up +4.22%. Global High Yield also performed well, rising +8.37%.

Period in review: 2nd half 2023

Global equities and fixed income were negative in Q3 2023, as economic headwinds remained and rising yields put pressure on different asset classes. Although economic growth posted a desynchronized picture across the globe, inflation data eased and trended lower overall, although surging oil prices caused some inflationary worries.

However, global equities and fixed income saw strong returns in Q4 2023, as a surprise dovish pivot by the Fed, resilient economic activity and a moderation in inflation data lifted market sentiment pushed stocks higher and yields lower. Broad asset classes rallied and helped stocks and bonds recover ground lost at the beginning of the quarter.

Outlook

Looking ahead into 2024, we expect lower interest rates to be accommodative for economic growth. In addition, inflation appears to be coming down and unemployment remains low. However, geopolitical challenges and the upcoming US Presidential Elections could pose challenges to investor sentiment. Accordingly, we expect that 2024 will be a more challenging year for global growth.

In most developed markets, central banks are likely to continue to push back against the higher magnitude of rate cut expectations that markets have priced in, even with inflation expected to be in the 2-3% range in 2024. The December Federal Open Market Committee (FOMC) meeting has shifted the narrative away from "are we at peak yet?" towards "when will the US Fed start cutting and by how much?"

The Summary of Economic Projections (SEP) has indicated three rate cuts in 2024 (vs two previously). The FOMC decision almost reads as an "all clear" signal on policy easing ahead. Reading the SEP, the US Fed expects the US economy to achieve a soft landing given moderating inflation, modest (but not negative) growth and a slightly higher unemployment rate. Recent data releases also suggested resilient US growth, as US consumers and retail sales remained strong. The US economy may slip into a mild to moderate recession within the next six months with two consecutive quarters of negative GDP growth, accompanied by a rise in the unemployment rate, and lending, consumer activity, capital investment and earnings are likely to weaken in the first half of the year.

Areas that could add uncertainty in the coming weeks and tilt the narrative back towards a riskier case of higher-for-longer interest rates include how markets react to the data, whether inflation continues to move in the right direction, and how lending conditions evolve. In any event, deteriorating economic conditions will probably push the US Fed into cutting rates in the second half of 2024.

Directors' Report

In Asia, negative sentiment has been dominated by a faltering structural trend in aggregate growth in China, with particularly persistent tail risks to the property sector. However, the gloom belies the green shoots of a cyclical rebound: car sales and commodity demand have been bright spots, and the lagged effects of incremental policy easing should generate some recovery in credit growth. Equity valuations in Asian markets tend towards the favorable side of the equation. Whilst we do not expect any cyclical rebound to be as large as previous cycles, we foresee tactical upside for Chinese risk assets as markets hope for a more meaningful support package in 2024.

In markets, the potential end of the global rate hike cycle is supportive of equities, but an uncertain macroeconomic landscape is a potential headwind. Corporate earnings have generally remained strong and consumers remained resilient. Oil prices have fallen against lackluster demand, though the escalating conflict in the Middle East has the potential for wide-ranging impact should other regional players get drawn in. Given the uncertainty surrounding several factors such as monetary policy, geopolitical tensions and recessionary risks, the focus is likely to be on quality of the stock, with a more defensive position being adopted generally.

As the excitement surrounding AI continues and the magnitude of its potential impact on revenue monetization, productivity and cost cutting attract greater attention, this may be a catalyst for growth opportunities in sectors likely to benefit the most.

High-yield bonds and loans have continued to benefit from comparatively high levels of carry and current yield from a historical basis, as well as from positive investor sentiment and spread levels that have moved tighter year-to-date.

Companies of lower credit quality will have to carefully navigate worsening conditions compounded by increased required rates of return by financial markets. Default rates have also picked up, particularly for CCC-rated issuers, and we believe this trend will likely continue, driven by a potentially weakening economy, a growing number of bonds maturing over the next few years and restrictive refinancing rates facing many corporations.

Overall, there are downside risks to the economy in 2024 which will need to be carefully navigated, given tighter credit conditions, and we believe we may see higher-for-longer interest rates given the potential for macro data disappointments.

2 Accounting policies

2.1 Presentation of Financial Statements

The financial statements are prepared under the going concern basis of accounting in accordance with Luxembourg regulations relating to undertakings for collective investments.

2.2 Investments

Listed securities and securities dealt in on another regulated market are valued on the basis of their last available market price at the "Valuation Point" on the period end date. The prospectus defines the "Valuation Point" as such time on each Business Day as may be determined by the Directors at which the Net Asset Value per Share of a respective Sub-Fund may be determined.

Non-listed securities and money market instruments listed or dealt on a regulated market but in respect of which the last sales price is not representative of the fair value, are valued on the basis of their probable sales prices as determined with prudence and in good faith by the Board of Directors upon the advice of the Investment Managers. Liquid assets are valued at their face value with interest accrued; in the case of short-term instruments (especially discount instruments) that have a maturity of less than 90 days, the value of the instrument based on the net acquisition cost, is gradually adjusted to the repurchase price thereof while the investment return calculated on the net acquisition cost is kept constant. In the event of material changes in market conditions, the valuation basis of the investment is adjusted to the new market yields.

In the event of it being impossible or incorrect to carry out a valuation in accordance with the above rules owing to particular circumstances, the Board of Directors is entitled to use other generally recognized valuation principles upon the advice of the Investment Managers, in order to reach a proper valuation of the Company's total assets.

Units of underlying UCI and UCITS (target funds) are valued on the basis of their last available Net Asset Value per unit or share reduced by any applicable charges.

Realised gains and losses on sales of investments in securities are determined on the basis of average cost.

Any resulting gains or losses are recognized in the Statement of Changes in Net Assets under the heading "Net profits/(losses) realised on sale of investments and options". The net change in unrealised appreciation/(depreciation) on investments and options is included in the Statement of Changes in Net Assets under the heading "Net change in unrealised appreciation/(depreciation) on investments and options".

Brokerage charges are taken into account in calculating the cost of investments.

As approved by the pricing committee, the valuation of Renminbi ("RMB") securities, denominated in Chinese Renminbi ("CNY") and traded through Hong Kong or Singapore, is done at the Hong Kong delivered Chinese Renminbi ("CNH") foreign exchange rate. All securities subject to this specific pricing process are indicated in the portfolios with a ***.

2.3 Investment Income

Dividends are credited to income on the date upon which the relevant securities are first listed as "ex-dividend", net of any irrecoverable withholding tax. Bond and deposit interest income is accrued on a daily basis.

Notes to the Financial Statements

For the six month period ended 31 December 2023

2 Accounting policies (continued)

2.7 Options

The Company may purchase and write (sell) options.

The risk associated with purchasing an option is that the Company pays a premium whether or not the option is exercised. Additionally, the Company bears the risk of loss of the premium and any change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities.

When the sub-fund writes an option, the premium received by the sub-fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. In writing covered options, the sub-fund bears market risk of an unfavourable change in the price of the security underlying the written option. Exercise of an option written by the sub-fund could result in the sub-fund selling or buying a security at a price different from the current market value. Losses from written market index call options may be unlimited.

Premiums received from writing options which expire unexercised are recorded by the sub-fund on the expiration date as realised gains from options transactions. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realised gain, or if the premium is less than the amount paid for the closing purchase transaction, as a realised loss. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the sub-fund has realised a gain or a loss. If a written put option is exercised, the premium reduces the cost basis of the security purchased by the sub-fund.

2.8 Swap contracts

Over-the-Counter ("OTC") swap contracts are valued by an independent pricing service. Centrally cleared swaps listed or settled on a multilateral or trade facility platform, such as a registered exchange, are valued at the daily settlement price determined by the respective exchange.

The unrealised appreciation/(depreciation) on swap contracts is included in the Statement of Net Assets under the headings "Unrealised appreciation on swap contracts" and "Unrealised depreciation on swap contracts".

Any resulting gains or losses are recognized in the Statement of Changes in Net Assets under the heading "Net profits/(losses) realised on swap contracts". The net change in unrealised appreciation/(depreciation) on swap contracts is included in the Statement of Changes in Net Assets under the heading "Net change in unrealised appreciation/(depreciation) on swap contracts".

2.9 Formation expenses

Formation expenses are amortized over five years commencing from the inception date of the relevant share classes of the relevant sub-funds.

2.10 Combined figures

The combined Statement of Net Assets, the combined Statement of Operations and the Combined Statement of Changes in Net Assets are expressed in United States Dollars.

For this purpose, the corresponding statements of each sub-fund have been translated into United States Dollars at the exchange rate prevailing at the balance sheet date.

9 Swing Pricing Policy

In order to manage the liquidity risks of the sub-funds and with the aim of protecting existing Shareholders of the sub-funds in the event of significant net cash inflows or outflows, the Company may make adjustments to the calculation of the Net Asset Value of any sub-fund on each Business Day in accordance with its swing pricing policy, which shall be set out as follows:

The Company may need to accommodate significant net cash inflows or outflows resulting from large subscription, redemption and/or switching activity by investors which result in high transaction costs associated with a sub-fund's portfolio trades. As a result, the sub-fund may suffer reduction of the NAV per Share ("dilution"). In order to reduce this dilution impact and to protect existing Shareholders' interests, a swing pricing policy ("Swing Pricing Policy") shall be adopted by the Company as part of its daily valuation policy. The Swing Pricing Policy shall be applicable to all sub-funds.

If on any Business Day, the aggregate net investor(s) transactions in Shares of a sub-fund exceed a pre-determined threshold as calculated as a percentage of the relevant sub-fund's Net Asset Value or as a fixed amount expressed in the base currency of the relevant sub-fund (as determined and reviewed by the Board or any duly authorised delegate of the Board from time to time), the NAV per Share of the sub-fund will be adjusted upwards or downwards to reflect the costs (including dealing costs and estimated bid/offer spreads) attributable to net inflows and net outflows respectively ("Adjustment") if the Board considers it is in the best interest of the investors.

The value of the Adjustment for each sub-fund will be reviewed at least twice a year to reflect the estimated costs of trading assets held by the relevant sub-fund and prevailing market conditions. The estimation procedure for the value of the Adjustment captures the main factors causing dealing costs. Such Adjustment may vary from sub-fund to sub-fund and will not exceed 2.00% of the original NAV per Share (the "Maximum Adjustment"). Under exceptional circumstances, the Directors may, in the interest of Shareholders, decide to temporarily increase the Maximum Adjustment indicated above, subject to prior notification thereof to Shareholders and investors. The value of the Adjustment is determined by the Board or any duly authorised delegate of the Board.

The Swing Pricing mechanism may be applied across all Sub-Funds.

Total Expense Ratios (TER)

The Total Expense Ratio has been calculated in accordance with the guidelines as set out by Asset Management Association Switzerland (previously Swiss Funds & Asset Management Association). This figure expresses the total commissions and costs currently charged to the corresponding sub-fund (expenses), which are calculated and shown as a percentage of the relevant Sub-Fund's assets.

The incidental costs incurred by the collective investment scheme on the purchase and sale of investments are not included in the operating expenses. These are integral to the investments themselves and accrue to the realized capital gains/losses on the sale of the investments.

Performance fees are not applicable to any of the sub-funds registered in Switzerland and therefore not included within the TER.
