THE FUND

Investment Objective

The investment objective of the Fund is to seek long term capital growth.

Investment Policies

Under normal market circumstances, the Fund will invest at least 80% of its Net Asset Value in a portfolio of equity and equity-related securities issued by Non-U.S. Companies of any capitalization size. The Fund may invest in all types of equity and equity-related securities, including exchange-traded and OTC common and preferred stocks, warrants, options, rights, Convertible Securities, Depositary Receipts, shares and REITs.

Investment by the Fund in securities of Chinese issuers is limited to those securities which are traded on a Regulated Market outside of mainland China (including but not limited to GDR) or China A Shares traded on the Stock Connect.

The Fund may also invest up to 10% of its net assets in equity participations which constitute Eligible Loans. An equity participation is a loan that gives the lender a portion of equity ownership in a property, in addition to principal and interest payments.

The Fund's investments, which may be denominated in U.S. or non-U.S. currencies, primarily focus on developed markets, but may include emerging and frontier market investments. Developed markets are markets that are typically those of developed countries which exhibit higher levels of economic and/or capital market development and lower levels of share price and currency volatility.

The Fund generally invests in equity securities of issuers that the Sub-Investment Manager believes are undervalued. The Sub-Investment Manager applies a bottom-up stock selection process using a combination of fundamental and quantitative analysis of issuer-specific factors such as price to book value, price to sales and earnings ratios, dividend yield and cash flow.

Further information in relation to Convertible Securities, Depositary Receipts, participatory notes and REITs is set out in the "INVESTMENT RISKS AND SPECIAL CONSIDERATIONS" section of the Prospectus.

The Fund may also invest up to 15% of its Net Asset Value in initial public offerings (IPOs). An IPO is a company's first offering of stock to the public.

Save as otherwise provided for in the Prospectus, all securities invested in will be listed or traded on the markets and exchanges listed in Schedule 1 of the Prospectus.

Use of FDI

The Fund may, to a limited extent, engage in FDI transactions namely put and call options, futures, forward contracts and swaps in lieu of investing directly in a security, currently or instrument, for hedging and non-hedging purposes, including reducing risk, obtaining efficient market exposure, and/or enhancing investment returns.

In addition, Convertible Securities may represent derived investment positions whose value at maturity or interest rate is linked to equity securities and which may therefore embed FDIs.

Further details of these FDIs are set out in the Prospectus under the "USE OF FINANCIAL DERIVATIVE INSTRUMENTS" section.

Based on the nature of the FDI utilised, the Fund utilises the commitment approach methodology for calculation of its global exposure. The Sub-Investment Manager does not employ leverage as an investment strategy; however, the use of FDI may introduce leverage into the Fund. The leverage exposure of the Fund through the use of FDIs will not exceed 100% of the Fund's Net Asset Value, as measured using the commitment approach.

The Manager operates a risk management process on behalf of the Fund in relation to its use of FDIs, details of which are set out in the Prospectus under the “USE OF FINANCIAL DERIVATIVE INSTRUMENTS: Risk Management” section.

Information on FDIs used for the Fund will be included in the Company’s semi-annual and annual reports and accounts. The Company will also provide information to Shareholders on request on the Risk Management Process employed by the Manager on the Fund’s behalf, including details of the quantitative limits applied and information on the risk and yield characteristics of the main categories of investments held on behalf of the Fund.

The risks attached to the use of FDI by the Fund are set in the “INVESTMENT RISKS AND SPECIAL CONSIDERATIONS” section of the Prospectus.

Investment Process

The Fund generally invests in the equity securities of issuers believed by the Sub-Investment Manager to be undervalued in the marketplace, focusing on issuers that combine attractive valuations, strong business fundamentals and positive business momentum. The Sub-Investment Manager applies a bottom up stock selection process (i.e. one that focuses primarily on issuer specific factors) in managing the Fund, using a combination of fundamental and quantitative analysis. In selecting investments for the Fund, the Sub-Investment Manager considers various valuation metrics such as free cash flow yield, price to book value, price to sales and earnings ratios and dividend yields. To assess business fundamentals, the Sub-Investment Manager may consider operating return on assets, return on investment capital (ROIC), return on equity (ROE), and balance sheet health. Positive business momentum refers to whether the business is improving. This does not refer to price momentum in the stock. Positive business momentum looks at how margins are improving, earnings are increasing or changes in the debt structure.

The Sub-Investment Manager will sell a stock when it no longer meets one or more investment criteria, either through obtaining target value or due to an adverse change in fundamentals or business momentum. Each holding has a target valuation established at purchase, which the Sub-Investment Manager constantly monitors and adjusts as appropriate.

Sub-Investment Manager

Pursuant to the Sub-Investment Management Agreement, the Manager has delegated the day to day portfolio management of the Fund to the Sub-Investment Manager.

The Sub-Investment Manager is a SEC regulated investment adviser having its registered office at One Beacon Street, 30th Floor, Boston, MA 02108. The Sub-Investment Manager provides investment advisory services to individual and institutional investors.

Base Currency

The Base Currency of the Fund is USD.

Investment Restrictions and Risk Management

The general investment restrictions as set out in the “INVESTMENT RESTRICTIONS” section of the Prospectus shall apply. The Fund will only invest in assets that are permitted under the Regulations.

Profile of a Typical Investor

The Fund is intended to serve as a long-term investment option and should not be viewed as an appropriate investment vehicle for short-term gain or trading. The Fund may be suitable for investors seeking long-term capital growth.

Benchmark Index

The Fund's performance will be compared to the MSCI Europe, Australasia, and Far East Index (the "**Comparator Benchmark**"). The Comparator Benchmark tracks the performance of publicly traded large and mid-cap stocks of companies in those regions. The Comparator Benchmark is used to compare the performance of the Fund against but is not used to constrain portfolio composition or as a target for the performance of the Fund.

RISK FACTORS

Investment in the Fund carries with it a degree of risk including, but not limited to, the risks described in the "INVESTMENT RISKS AND SPECIAL CONSIDERATIONS" section of the Prospectus. The Manager considers that the investment risks that are ticked in the "INVESTMENT RISKS APPLICABLE TO EACH FUND" section of the Prospectus are relevant to an investment in the Fund. These investment risks are not purported to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before making an application for Shares. There can be no assurance that the Fund will achieve its investment objective.
